the story of quality begins...

The early foundations of the **Güneydoğu Entegre Antepfıstıkçılık** were laid by Gazi Yılmaz, the founder of our company, in Gaziantep in 1978. Initially, our company started to sell pistachio to İstanbul and neighboring cities, and then continued its activities under the name of **Güneydoğu Antepfıstıkçılık San. ve Tic. A.Ş.** in İstanbul as of 1986. Our company serves to ice-cream, chocolate, dessert, pastry, delight and halva manufacturers with its industrial products such as unshelled pistachio, cracked pistachio, pure and sugar-coated pistachios. In 2019, **Güneydoğu Antepfıstıkçılık San. ve Tic. A.Ş.** moved its production facility to Nizip district of Gaziantep and has introduced the most modern and hygienic integrated pistachio production facility to our country, leading the way in the pistachio production.

Güneydoğu Company has become a distinguished company with its importance given to its customers and product quality. With the aim of excellence in its production, **Güneydoğu Company** continuously improves its systems and processes with its established Sedex Social Responsibility Rules, BRC Quality System, TPM Approach. **Güneydoğu Company** is a preferred brand in the world markets.

GÜNEYDOĞU®

INTEGRATED PISTACHIO INDUSTRY

SINCE 1978

Production

Skillful Hands at Work

Güneydoğu Entegre Antepfistıkçılık produces and markets the quality products as required in the first time by means of its established management system and processes, starting from selection of raw materials.

Services focused on quality and hygiene in production...
Güneydoğu Entegre Antepfistıkçılık production is always by you.

Experience the difference
with **Güneydoğu**, which makes
production with hygiene and high
quality standards.

Raw Product Production Area

In raw product production area; deskinning, crushing, cracking, and size sorting processes of freshly gathered products are performed on conveyor systems by laser sorters and workers.

Pistachio Deskinning Line

In pistachio deskinning line; freshly gathered products are separated from their outer skin.

Pistachio Cracking Line

In pistachio cracking line;
the pistachios in fully seated
shells on the downstream of
deskinning line are cracked
partly open.

Before ——— After

Pistachio Crushing Line

In pistachio crushing line; the seeds of pistachios, fed from the downstream of pistachio deskinning line, are extracted by means of machines.

Pistachio Sorting Lines

In pistachio sorting line; the processes such as removal of foreign materials, unwanted grains and color separation for the products fed by cracking and crushing lines are performed by use of laser sorters. After being processed by the laser sorter, the products conveyed to the sorting lines are checked by experienced personnel and the product quality is assured.

Roasted Product Production Area

In roasted product production area; roasting and chopping and %100 natural paste processes are performed for the products in raw products area.

This area has special hygienic conditions. The workers go through an automatic hand washing and disinfection system, change their shoes and wear special clothes. Additionally, there is a textile based ventilation system with hepa filter system in the production area and positive air pressure is provided. The floors and walls are covered with special epoxy ceramics and the drainage system is hygienically designed.

Pistachio Roasting Line

In pistachio roasting line; the process of roasting is performed for the seeds and unshelled pistachios produced in the raw production area.

Pistachio Chopping Line

In pistachio chopping line;
the seeds of pistachio, fed from roasting line, are separated from their seed coat,
cracked and sorted as well.

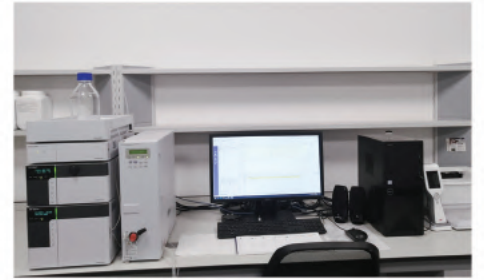

Pistachio Paste and Sugar Coating Lines

In pistachio paste line;

the pistachios are crushed into fluid paste form by means of ball mill.

And in pistachio sugar coating line; the pistachios are coated with sugar.

Quality is Always Under Our Control

Güneydoğu Entegre Antepfıstıkçılık corporate aim is to make our customers happy by offering products that meet or exceed their expectations in order to maintain customer-consumer loyalty and brand value with reliable, innovative products and service understanding in accordance with world and country standards, and to be the brand they prefer every time. We aim to grow in a sustainable and profitable way by using our food safety and quality management system effectively.

To achieve excellence in the quality and services.

Güneydoğu Entegre Antepfıstıkçılık provides safe and healthy conditions to its employees with SEDEX social responsibility and compliance certificate and also provides food safety with BRC quality certificate .

In addition to our Physical-Chemical Laboratory, we have a Microbiological Laboratory consisting of 4 sections designed to prevent cross contamination. We can make reliable aflatoxin measurements with our HPLC device. **Other analyzes we have done in our own laboratory are as follows;**

- Acidity • Peroxide • Humidity
- Microbiological analyzes (Total Bacteria, Enterobacter, Coliform, Mold & Yeast, E.Coli)
- Environmental Analyzes • Personel Swap • Equipment Cleaning Control With ATP • Physical Analyzes
